Description :

PDF-5deb3 | Neuroscience tells us that the products of the mind--thought, emotions, artistic creation--are the result of the interactions of the biological brain with our senses and the physical world: in short, that thinking and learning are the products of a biological process. This realization, that learning actually alters the brain by changing the number and strength of synapses, offers a powerful foundation... *The Art of Changing the Brain: Enriching the Practice of Teaching by Exploring the Biology of Learning*
