Description :

PDF-be50d | India's energy consumption pattern is in transition. The share of gas in the primary commercial energy mix is likely to rise from its current level of 8 % to 20 % by 2024-25. Large gas discoveries in the eastern offshore basin, which came into production in 2009, have doubled domestic supply. However, national gas policies, which were formulated during an era of shortages, have only recently begun... *Natural Gas in India: Liberalisation and Policy*
